Pouch Opening & Filling Machines

Our semi-automatic pouch opening and filling machines require just a single operator. They incorporate a conical pouch opener to open stand-up plastic pouches, and accurately deposit hot or cold liquid and semi-liquid products.

Bag Filling & Clipping Machines

With a deposit range up to 5000ml, our semi-automatic bag filling machines incorporate a bag clipper, and designed for accurately depositing hot or cold liquid, semi-liquid and suspended solid products into plastic bags.

Large Bag Filling & Sealing Machines

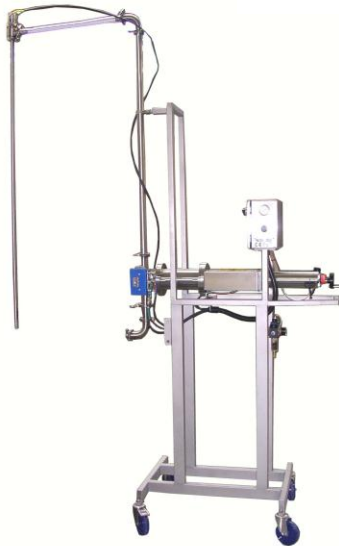

We manufacture standard or bespoke, semi-automatic bag filling and sealing machines. Ideally suited to medium scale food manufacturers, they are designed with an incorporated heat sealing system and with a deposit range up to 5000ml they accurately deposit hot or cold liquid, semi-liquid and suspended solid products into large plastic bags or sacks.

- Semi-automatic
- Only a single operator required
- Fill and seal large plastic bags or sacks
- High quality construction using 316 food grade stainless steel on all contact parts
- Designed for depositing hot or cold liquids, semi-liquids, suspended solids
- "Single" deposit range up to 5000ml
- Operator friendly
- Hygienic, easy to clean, quick to strip down, simple to maintain
- Comprehensive guarantee and full after sales support

V.F.F.S. Depositors

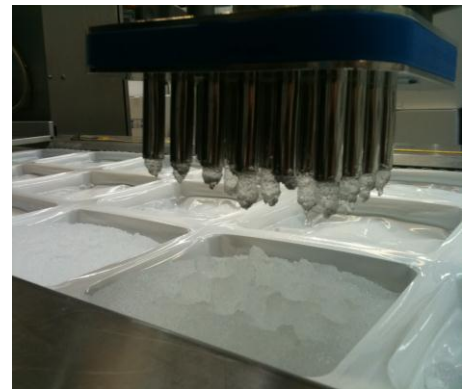

We manufacture standard or bespoke design depositors for use with Vertical Form Fill & Seal machinery. Each machine in this range is designed and built to suit the specific needs of the food manufacturer.

- Standard or bespoke design
- Fully automatic
- High quality construction using 316 food grade stainless steel on contact parts
- Operator friendly
- Hygienic, easy to clean, simple to maintain

Thermo Form Depositors

We manufacture standard or bespoke, automatic multi-head depositors designed for dosing products into high speed thermo-form conveyors. Each machine in this range is designed and built to suit the specific needs of the manufacturer.

- Standard or bespoke design
- Fully automatic
- High quality construction using 316 food grade stainless steel on contact parts
- Operator friendly
- Hygienic, easy to clean, simple to maintain
- Comprehensive guarantee and full after sales support
